

You have your sights set on eastern Indonesia... SO DO WE

PT Schenker Petrolog Utama (SPU) continues to strengthen its capabilities in eastern Indonesia to facilitate more trade in the region.

Through our Surabaya control tower, we efficiently handle your shipments to and from **Banjarmasin, Balikpapan, Makassar, Manado, Ambon, Kupang, Kendari, Jayapura, Sorong** and other eastern Indonesian ports.

By constantly refining our service offerings to meet market needs, we help to optimize your supply chain through better connections between eastern Indonesia and other parts of Indonesia, as well as global import and export markets in Asia, Europe and the U.S.

For your direct shipments to and from eastern Indonesia, you can choose to work with one of our selected international ocean carrier partners or with domestic carriers for the intra-Indonesia shipments.

We also provide complete, end-to-end logistics services through our cross-docking facility in Surabaya, where we work with domestic and international partners. Our Surabaya cross docking facility is strategically located between Tanjung Perak and Teluk Lamong seaports.

SPU provides both road transport services and domestic multimodal solutions, using rail, water, and air. We are a registered customs broker with the Makassar Customs office, and for other eastern Indonesia ports, we work closely with local partners to ensure a smooth customs clearance process.

Using our controlled networks and partners and by ensuring the best people, processes and technology available, SPU takes care of your supply chain needs 24/7.
