## What is Halal Logistics?

Halal logistics is defined as the process of **managing the movement, storage & materials handling of halal raw materials, semi-finished or finished products along the supply chain** in accordance to the general principle of Shariah Law & Halal standard.

## Halal Supply Chain

Factory

Transportation

Storage

Transportation

Retailer

## Why do we need Halal Logistics ?

To **avoid cross-contamination** between halal and non-halal products

To ensure **consistency** with halal requirements & also expectation of Muslim consumer

To **preserve the halal integrity** of products, goods and/or cargo throughout the supply chain

## The practice

Establishment and implementation of procedures throughout the halal logistics activities

**Stringent hygiene** practices in logistics operations

**Physical Segregation** of halal products from non-halal products through dedicated halal distribution centre and no mixing in transportation

**Monitoring and control measures** at Halal Control Point (HCP) throughout the logistics process to eliminate/prevent any potential halal contamination

Food/Product Safety & Hygiene

Extend Halal Assurance from factory to the point of consumer purchase

Creating a robust, effective & efficient halal supply chain

## Halal Logistics Benefits

Strengthen commercial brands & customer trust

Contamination Avoidance
